

## EFF STATEMENT CONGRATULATING INDIA FOR SUCCESSFUL MOON LANDING

Thursday, 24 August 2023

The Economic Freedom Fighters (EFF) extend their congratulations to the nation of India for achieving a historic milestone by successfully landing a spacecraft near the south pole of the moon.

This achievement signifies a momentous juncture in the realm of space exploration, representing a dual victory of being the pioneering nation to land on the moon's south pole and the fourth nation to achieve a successful lunar landing.

The EFF commends the impressive efforts of the Indian Space Research Organisation for achieving the remarkable feat of landing the Chandrayaan-3 spacecraft near the lesser-explored lunar south pole.

The triumphant landing underscores India's ascent as a space powerhouse, aligning with the government's efforts to stimulate investment in private space launches and associated satellite-based enterprises.

It's evident that the global landscape is shifting, as novel nations rise with innovation, surpassing Western countries that once saw themselves as technological forerunners. We wish the Chandrayaan-3 a successful exploration that propels the world onward in our comprehension of the moon and the vast universe that envelops us.
