

EFF CALLS ON THE USA TO BACKUP ITS TERRORIST ATTACK CLAIMS WITH EVIDENCE

Thursday, 27 October 2022

The Economic Freedom Fighters (EFF) calls on the USA Embassy in South Africa to provide evidence for its claims of a possible terrorist attack in Sandton. The United States foreign missions are well known to be information peddlers, embedded in international terrorist networks.

It is also a historic fact that the USA invaded Iraq based on faulty intelligence: this action alone unleashed the greatest human rights violation by a government since the holocaust.

For all we know, the CIA's agents working with terrorist groups are the ones staging the terrorist attack so as to destabilise our country. Alternatively, the claim seeks to impact the international reputation and standing our country as one which is terrorist infested.

It is not the first time that the USA South Africa embassy makes such a warning related to Sandton. Even then, they could never back it up with credible evidence.

We reject these warnings as part of a self-made plot to destabilise our country and damage its reputation. If the USA really seeks to protect lives they must cooperate openly with our agencies and share evidence of their claims.
